Subject: Censure of Alabama Hurricane Office Forecast

Sir:
The recent reported censure of your Alabama office for “correcting” the President’s bizarre statement during the recent Dorian event boggles my mind! Could you respond to my email and explain how this came to be?

I support NOAA retired officials and current officials who are equally dumbfounded about what happened.

Should you or others resign? If we can’t trust a NOAA forecast and are informed by NOAA to believe the this President’s forecast with his track records of lies, then what is the purpose of a weather forecast?

Robert Bosch
